Our Services

Our business and technological skill combined with creativity and penchant for innovative ideas are targeted to deliver maximum value to our customers. We offer a full range of services in web designing, web applications and custom software ranging from system applications to business application development. Our software engineering expertise covers almost all available platforms and numerous technologies. We are concentrating on specific technological areas and business knowledge in the selected spheres.

Custom Application Development

Needless to say, that the present world is highly competitive and challenging. So it is the need of the hour for the companies to increase revenue, reduce costs, improve efficiency and raise customer satisfaction levels. Argus Technologies takes this challenge and provides full life-cycle solutions starting from requirement analysis to maintenance, focuses on enhancing productivity as well as maximizing utilization of resources. Argus products include- HR and Payroll, Inventory Control, Financial Accounts, Job Costing and Real Estate.

Web Solutions

Website could mean a lot of different things to an organization. It is the face of your organization that gives an online graphic identity or placing your marketing content or bringing up an interface for customers or end-users to your corporate common platform or just an Internet existence. So it needs specialized people who not just have Web Designing expertise, but also have outstanding graphic presentation of content.

Argus Technologies with its commitment to Research & Development on emerging technologies has experience in developing database-driven web-based application solutions. Argus Technologies offers fully customized Web Development Solutions for organizations and individuals meeting their business ends including the following.

- Interactive Applications
- E-commerce
- Shopping Carts
